[https://certificates.ccbp.in/intensive/irc?id=T44GF0G5YV](https://certificates.ccbp.in/intensive/irc?id=T44GF0G5YV)

# Personal Projects

- **Book Hub (Goodreads Clone) - [bkhub.webdevsop.tech/](bkhub.webdevsop.tech/)**
  - Implemented responsive Goodreads Clone where users can log in and see a list of books, bookshelves like all shelves (books sorted by rating), completed reading shelf, currently reading shelf, want to read shelf, and user can also search books with author's name and book's name.
  - Implemented different routes for features like login, home, and bookshelves by using React Router components Route, Switch, and Link.
  - Implemented stars (rating), and dropdown (select) using React Third Party libraries called React Rating Stars, and React Select.
  - Used Figma mockups to implement UI-rich and pixel-perfect React components.
  - Used fetch to call REST APIs for a list of books, bookshelves details and books search APIs.
  - Implemented username and password authentication and persisted login state using client

- **Online Class Room (Udemy Lite) - [https://mern-online-class-fronted.vercel.app/](https://mern-online-class-fronted.vercel.app/)**
  - Next.js-based platform that offers fast page load times and improved SEO
  - Login, signup, and password encryption for secure user authentication
  - Razorpay payment gateway integration for secure online transactions
  - Chakra UI component library for beautiful and accessible design
  - Features a dashboard for teachers to manage courses and track student progress
  - Students can purchase courses and track their progress, with automatic video playback to resume from where they left off
  - Offers an intuitive and user-friendly experience for both teachers and students
  - Provides a comprehensive solution for online course creation and consumption.

- **Web 3 Chat App - No link (Moralis is Expensive)**
  - Next.js-based platform for efficient and performant web3 chat application
  - Users can log in with their Metamask wallet address using Moralis for secure authentication
  - Moralis is used for storage of chat messages and other data
  - Supports sending emojis, videos, gifs, and images in real-time
  - Real-time sync to ensure all users see the same chat messages
  - Built using Tailwind for beautiful and efficient design
  - Offers an intuitive and user-friendly experience for chat participants
  - Provides a comprehensive solution for web3 chat communication.

- **Covid Tracker App -** [https://c19.rehanashaik.me/](https://c19.rehanashaik.me/)
  - Beautiful UI design
  - Real-time statistics for each country, including death, confirmed, and recovered cases
  - Today's updates for both country and international cases
  - Easy filtering of data by country
  - Reliable data sources to ensure accuracy of statistics
  - Built with React for a fast and efficient user experience
  - Provides a comprehensive solution for tracking COVID-19 cases worldwide
  - **Note: occasional loading issues may occur due to third-party API usage.**

- **Google Search Lite -** [https://google-clone-kappa-three.vercel.app/](https://google-clone-kappa-three.vercel.app/)
  - Google search engine clone built with React, Redux, and Tailwind CSS
  - Beautiful and modern design that closely mimics the real Google search engine
  - Allows users to perform search queries with accurate results
  - Offers a fast and efficient search experience thanks to Redux state management
  - Utilizes Tailwind CSS for responsive and mobile-friendly design
  - Integrates with third-party APIs to provide accurate search results and suggestions
